Office Action Summary	Application No. 10/660,039	Applicant(s) FARLEY ET AL.	
	Examiner Tamar Harper	Art Unit 3714	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

It is noted that this application appears to claim subject matter disclosed in prior Application No. 09/365,861, filed 08/03/99. A reference to the prior application must be inserted as the first sentence(s) of the specification of this application or in an application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e), 120, 121, or 365(c). See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, 121, or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all nonprovisional applications. If the application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such

Art Unit: 3714

prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A benefit claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed benefit claim under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

If the reference to the prior application was previously submitted within the time period set forth in 37 CFR 1.78(a), but not in the first sentence(s) of the specification or an application data sheet (ADS) as required by 37 CFR 1.78(a) (e.g., if the reference was submitted in an oath or declaration or the application transmittal letter), and the information concerning the benefit claim was recognized by the Office as shown by its inclusion on the first filing receipt, the petition under 37 CFR 1.78(a) and the surcharge under 37 CFR 1.17(t) are not required. Applicant is still required to submit the reference in compliance with 37 CFR 1.78(a) by filing an amendment to the first sentence(s) of the specification or an ADS. See MPEP § 201.11.

Claim Objections

Claim 1 objected to because of the following informalities: Applicant recites the preamble without the proper end punctuation. The examiner recommends that Applicant insert a “.” at the end of “steps of”. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Bacchi (4,755,941).

Claim 1: Bacchi discloses a monitoring system that monitors and records each transaction that takes place on a gaming table.

(a) The system includes a tray for receiving gaming chips and sensors for sensing the chips held by the tray (Abstract). The sensors or photocells are arranged such that at any instant they provide signals regarding the total number of chips of each denomination or value can be ascertained (Col. 3:1-5).

(b) The cash apparatus comprises of a strong box and a pusher for pushing currency through the aperture of the strong box. A microswitch (sensor) or infrared sensor is mounted through the wall of the aperture each time the pusher is inserted into the aperture. A keyboard is located adjacent to the aperture and each time the croupier receives any bank notes he keys the amounts into the

Art Unit: 3714

keyboard and inserts the notes in the strong box, with the use of the pusher. As a result the sensor will signal this action and the information regarding the notes is stored (Col. 2:21-40).

(c) A computer receives signals from the photocells representative of the chips present or number of chips. The said computer also receives information regarding the amount of currency entered into the strong box (Col. 3:16-22). As a result, the system enables management to conduct an analysis of each transaction of a gaming table, to provide figures based on the profitability of the table, the competence and integrity of the croupier, and alert the casino of loss based on patrons trying to defraud the casino (Abstract, Col 4:10-15).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The US Patents of Batalianets (5,495,929), Strisower (6,260,757), Mazur (6,241,069), Storch (5,283,422), Jones II (6,154,131), and Walker (6,110,042) teach similar structured systems.
